
A
Standing resistance and rebound weight
n = 953; Spearman rho = 0.79
Fitted rebound weight q
Realized standing resistant fraction
B
Resistance effect and rebound growth
n = 953; Spearman rho = 0.31
Fitted growth rate g
Target mean resistance effect
C
Turnover and fitted decline
n = 953; Spearman rho = 0.05
Fitted decline rate d
Turnover
D
Resulting decline-rebound geometry
n = 953; Spearman rho = -0.03
Fitted growth rate g
Fitted decline rate d
